DAYTONA

New

The all new Daytona Series is made up of four classic designs for today's heavily modified Pro-Touring cars. Each design features design depth not found in any other 2-piece Pro-Touring wheel. Made from forged 6061-T6, the Daytona Series has the quality and performance to back up the style.

- Classic styling with modern design detail
- Center backspacing in 0.25" increments for the perfect fit
- All new 2-pc design with 360 degree radial weld
- Spun 6000 series forged rim shell

Sizes: 18" / 19" / 20"

Widths: 7" to 15"

Styles: 4

Finishes: Custom Finishes Available

Material: Aircraft Quality Forged 6061

DS570

CORSAIR

Built for the track

- Specifically designed for road race use and the wheel of choice for top Pro SCCA and IMSA performance builders
- Extended back bell and narrow drop center fit large diameter performance brake packages
- Monoblock construction from forged 6061-T6 material results in extremely lightweight wheels
- All styles pass a 3,000 lbs. (per wheel) cornering fatigue test load at 300,000 cycles
- Optional shot peen for added strength

Diameters: 18"

Widths: 6" to 14.5"

Styles: 6

Finishes: Custom Finishes Available

Material: Aircraft Quality Forged 6061

SP SERIES

Born & bred on the track – designed to handle the street

- Superior balance due to the monoblock's extremely low radial runout factor
- 100% precision CNC machined 6061 held to exacting tolerances
- Lack of seams and joints means a leak-proof, true wheel

Diameters: 19" / 20"

Styles: 7

Finishes: Custom Finishes Available

Material: Aircraft Quality Forged 6061 Monoblock

FINISH IT RIGHT WITH WELD CALIPER COVERS

Want that custom matched performance look that highlights your WELD forged wheels? WELD is pleased to offer a new line of branded brake caliper covers. Match the high performance look of your WELD wheels with new WELD caliper covers.

Available in red, gloss black and matte black, the WELD Racing branded covers are manufactured in the U.S.A. from 6061-T6 aerospace grade aluminum.

They are TIG welded for strength, powdercoated for durability, and include a patented stainless steel fastening system. Easy to install, with most jobs taking just one hour to complete. No adhesive, tape, or caliper modifications required.
